

Image Facts Sheet

Project #3

Name: _____

Due Date: _____

Filename: **mars.jpg**

You need to provide two images to complete this project:

1. An image of yourself
2. An image of tile floor.

One of these images must be scanned into the computer while the other taken using a digital camera. The instructor will provide the digital camera during lab time in the computer classroom. Scanners are also attached to each of the computers in the computer classroom. Instructions on how to operate the scanner are available from the instructor.

Overview: Use the Cloning Stamp tool to clone the tile floor image you provided onto *mars.jpg*. Use the Magic Lasso tool to copy just yourself from the image you provided onto the tile floor you just cloned into *mars.jpg*. Add your first and last name to the image using a font, color, drop shadow, bevel and emboss settings of your own choice. Save the results in a high-resolution .jpg file format and print it using a 6-inch width.

For complete credit attach the final image to this facts sheet, briefly describe the images you provided and record of the settings you used for the following image elements:

1. Describe the image you scanned for this project:

2. Describe the digital photograph you used for this project:

3. Text
